

CASE STUDY

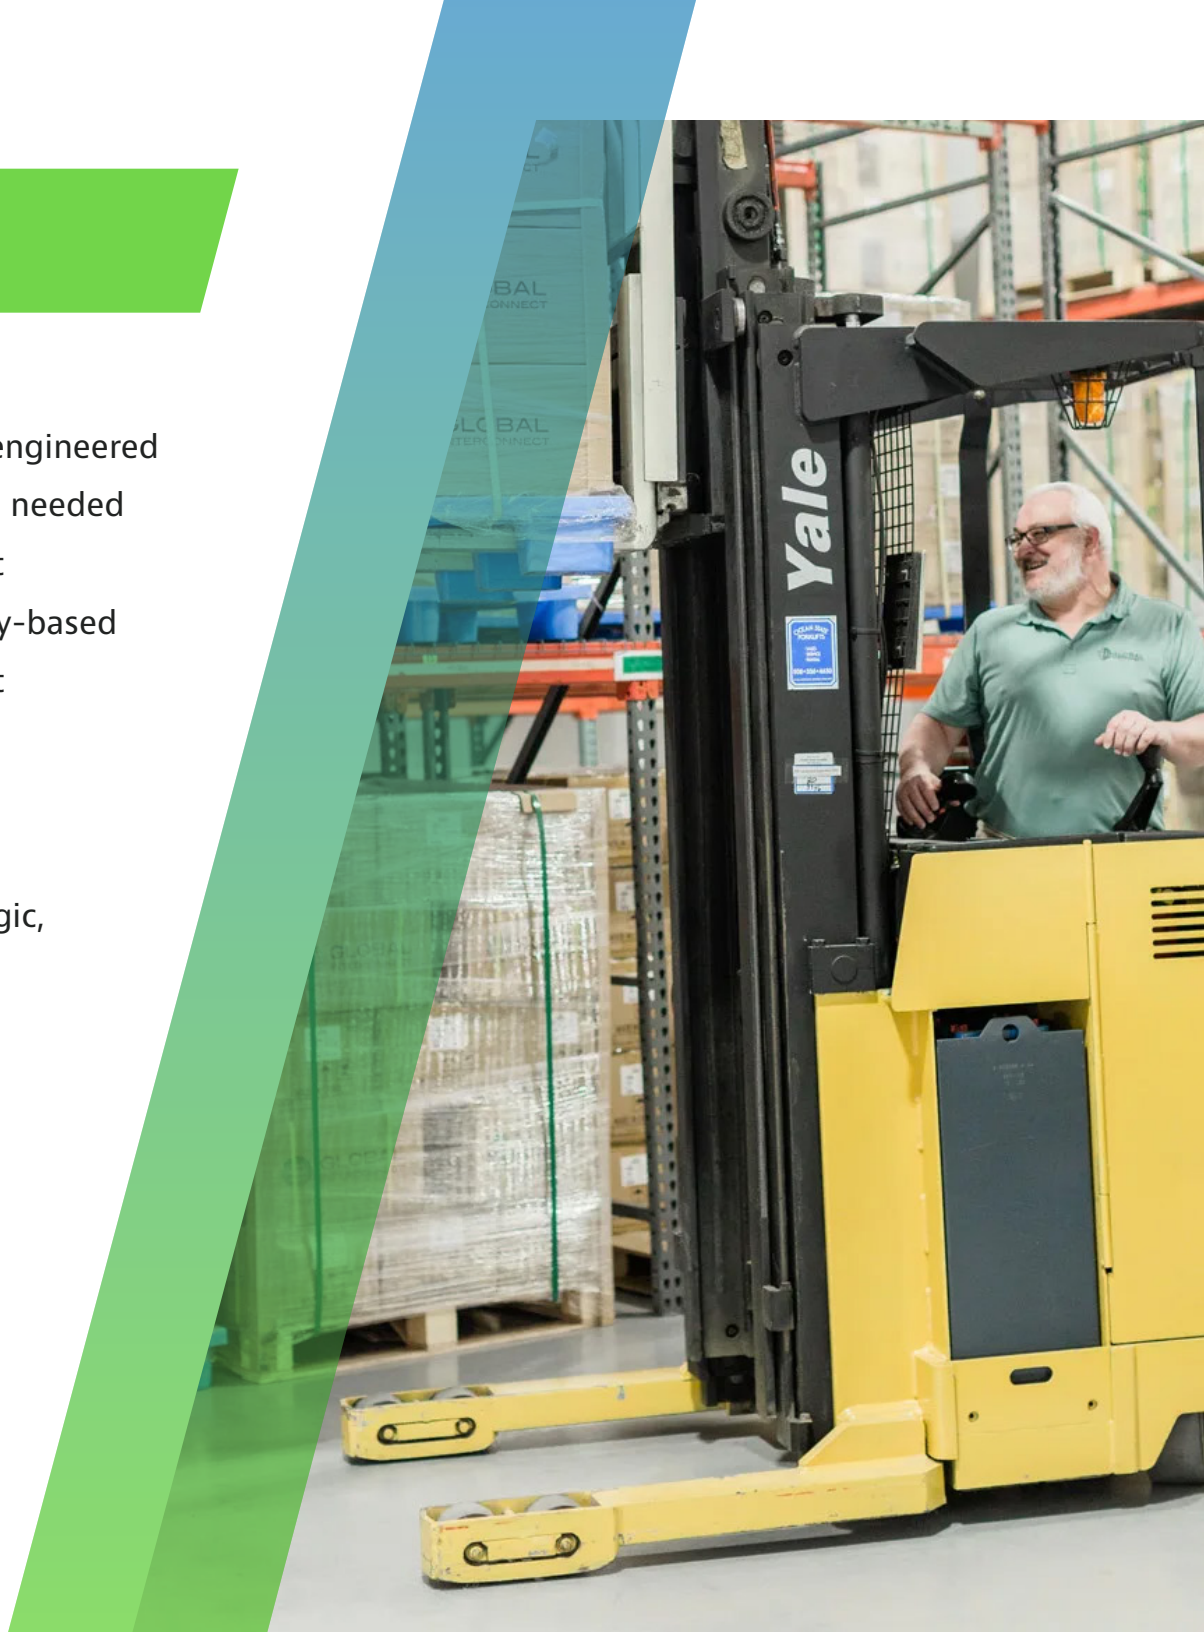

How Materialogic Transformed Global Interconnect's Logistics

THE CHALLENGE

Global Interconnect, a leading provider of custom-engineered connector, cable, and electromechanical assemblies, needed to improve their logistics operations to better meet customer needs. With customers working on energy-based and diagnostic medical devices, Global Interconnect wanted to ensure that they delivered operational excellence every step of the way.

Partnering with a 3PL solutions provider, Materialogic, Global Interconnect aimed to bridge this gap. They needed to implement smart logistics solutions to improve efficiency and provide end-to-end operational excellence.

THE SOLUTION

Global Interconnect tackled their need for increased operational excellence through logistics by partnering with Materialogic, a company with extensive experience in warehousing and supply chain management. Materialogic's central warehouse in St. Louis offered a unified location for both receiving customer products from Asia and delivering finished goods.

Additionally, Materialogic's advanced logistics software offered real-time inventory tracking and shipment notifications, increasing transparency and communication throughout the entire supply chain. With every solution delivered, Materialogic provided Global Interconnect with 40+ years of world-class expertise.

THE RESULTS

The partnership between Global Interconnect and Materialogic yielded positive results for both companies and their customers. By leveraging Materialogic's expertise and technology, Global Interconnect was able to offer enhanced logistics solutions, streamlining customer supply chains.

This resulted in significant lead time advantages, particularly when it came to importing materials and delivering finished products. Furthermore, Materialogic's real-time inventory tracking and communication features fostered greater supply chain transparency, leading to improved customer satisfaction for Global Interconnect.

A TRUE PARTNER IN LOGISTICS

After partnering with Materiallogic, Global Interconnect not only met but exceeded their goal of operational excellence in logistics. The collaboration led to streamlined supply chains, significant lead time advantages, and improved customer satisfaction. Materiallogic's 40+ years of expertise and advanced logistics software proved to be pivotal in achieving these results.
